
How to create a Bootable USB

By default, every computer that you buy have a Windows 10 or Windows 11 as operating system

Install Windows 10 from a bootable USB Drive

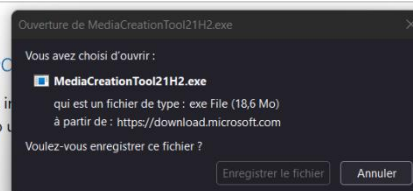

- 1- Visit this URL : https://www.microsoft.com/en-us/software-download/windows10?ranMID=24542&ranEAID=TnL5HPStwNw&ranSiteID=TnL5HPStwNw-Qf_wFa39sdy1WPYXgGMRYA&epi=TnL5HPStwNw-Qf_wFa39sdy1WPYXgGMRYA&irgwc=1&OCID=AID2200057_aff_7593_124_3925&tduid=%28ir_xberr0ovmwkf6gmag9n9xxpcc22xtkxkzzztyhec00%29%287593%29%281243925%29%28TnL5HPStwNw-Qf_wFa39sdy1WPYXgGMRYA%29%28%29&irclidid=xberr0ovmwkf6gmag9n9xxpcc22xtkxkzzztyhec00
- 2- Dans la section Create Windows 10 installation media, click on download tools now and click on download this file

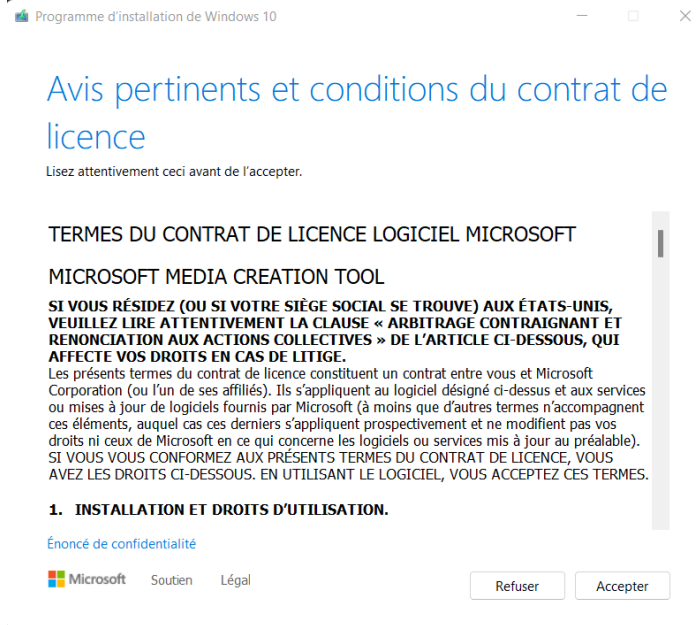

Create Windows 10 installation media

To get started, you will first need to have a license to install Windows 10 on your PC. For more information on how to get a license, click on the link below.

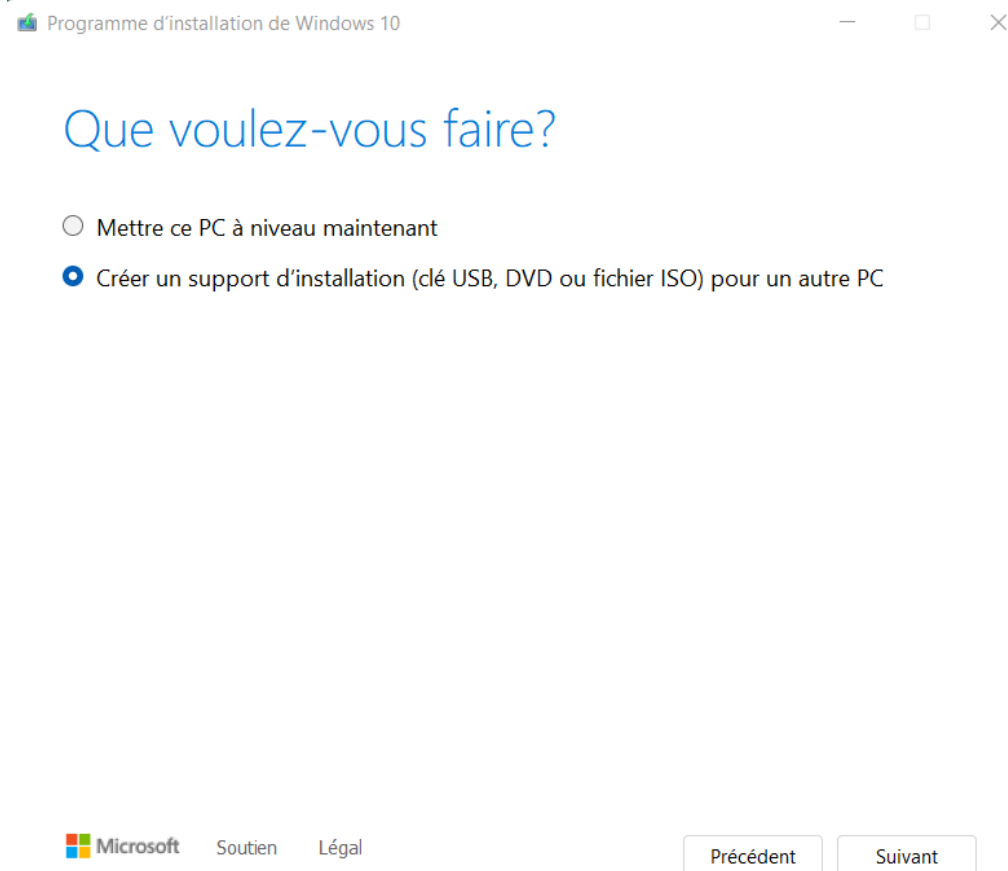

[Download tool now](#)

3- Accept the terms and the license

4- Create support for another PC by clicking on its button and then click Next

5- Configure the parameters and the architecture of Windows 10 and click Next

Programme d'installation de Windows 10

Sélectionnez la langue, l'architecture et l'édition

Veuillez sélectionner l'une des options disponibles pour continuer.

Ali, Hamza (1839821@bdeb.qc.ca) est connecté

Langue: français (Canada)

Édition: Windows 10

Architecture: 64 bits (x64)

☒ Utilisez les options recommandées pour ce PC

Microsoft Soutien Légal

Précédent Suivant

6- Select the support to use and then click Next

Programme d'installation de Windows 10

Sélectionnez le support à utiliser

Si vous souhaitez installer Windows 10 sur une autre partition, vous devrez créer et exécuter le support pour l'installer.

☒ Lecteur flash USB
Il faut au moins 8 Go

☐ Fichier ISO
Par la suite, vous devrez graver le fichier ISO sur un DVD.

8- Wait for the downloading, and creation and its then done and Finish

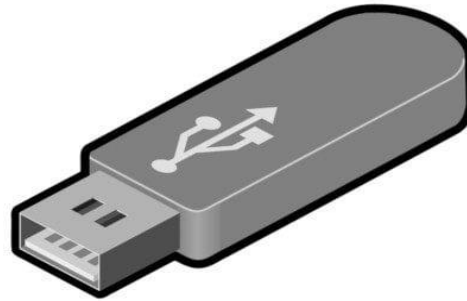

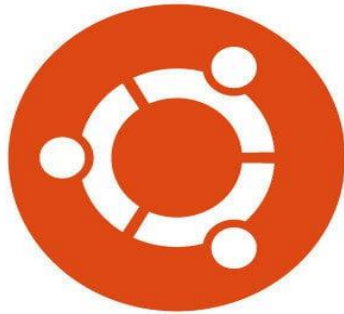

Proof that it is done:

In most cases while facing errors, Windows 10 need the USB to be in the format NTFS or need a new partition for this newly created disk. If the USB is not detectable by your device nor it is opening, then tools like GParted or similar can be of a great use to create a partition for your USB disk

Install Linux from a bootable USB Drive

- 1- By using a bootable USB key Creator like Rufus or (Universal USB Installer in this example), create a boot from USB

URL for UUI: <https://www.pendrivelinux.com/universal-usb-installer-easy-as-1-2-3/>

- 2- Download Universe-USB-Installer-(2.0.1.0).exe
Download Universal USB Installer (UUI)

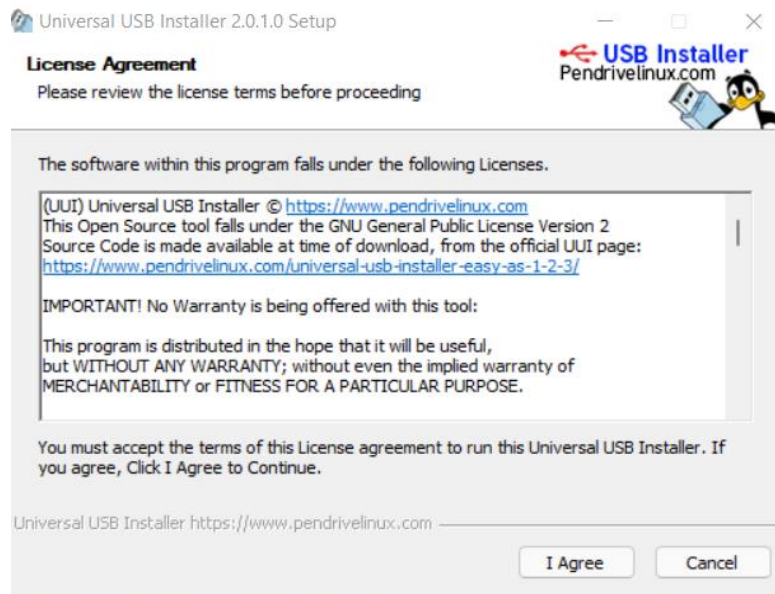

30 Jan 2022 Universal-USB-Installer-2.0.1.0.exe: Support newer versions of Redo
Rescue Backup and Recovery.

SHA-256:1DCD46FC74C7F50A6D0CC7A6BDB106DA9BEF9E7CA50BD18E9C90CDF3DA101457

3- Agree with the license

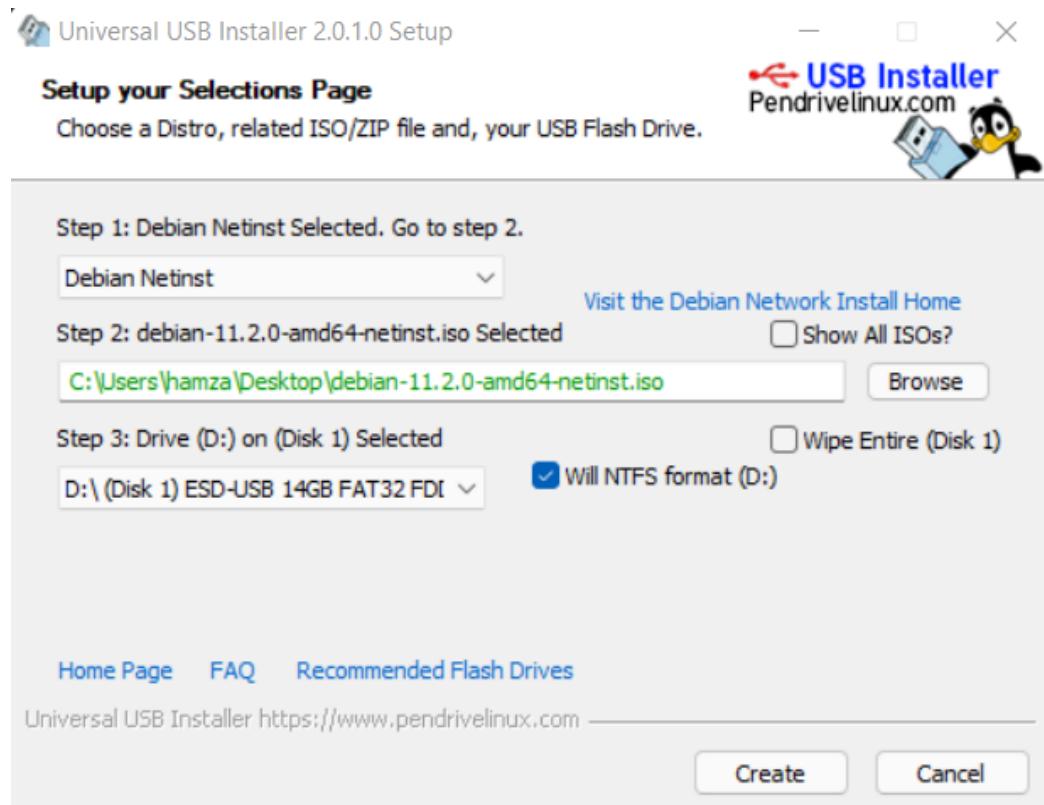

4- Configure the Boot USB

For example's sake: Step 1) Select Linux Distribution (Debian)

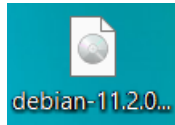

Step 2) Select the related .iso (Debian-11.2.0-amd64-netinst.iso)

Step 3) Select the targeted drive and format it (fat32 or ntfs)

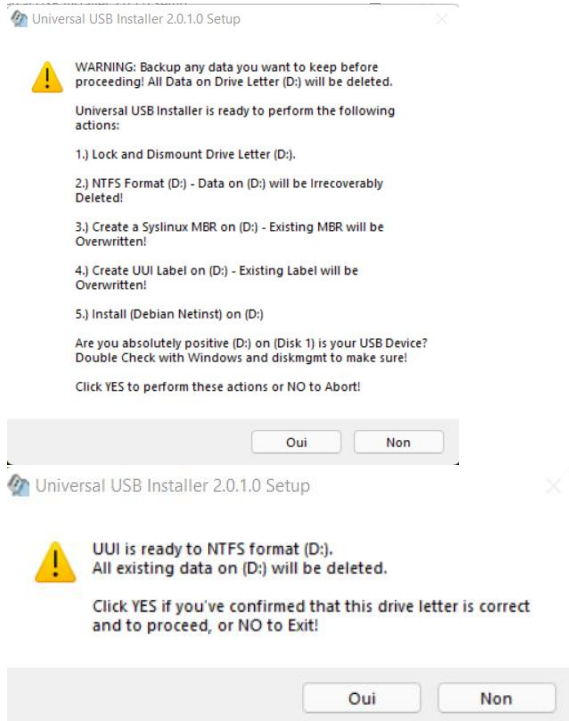

then click on Create

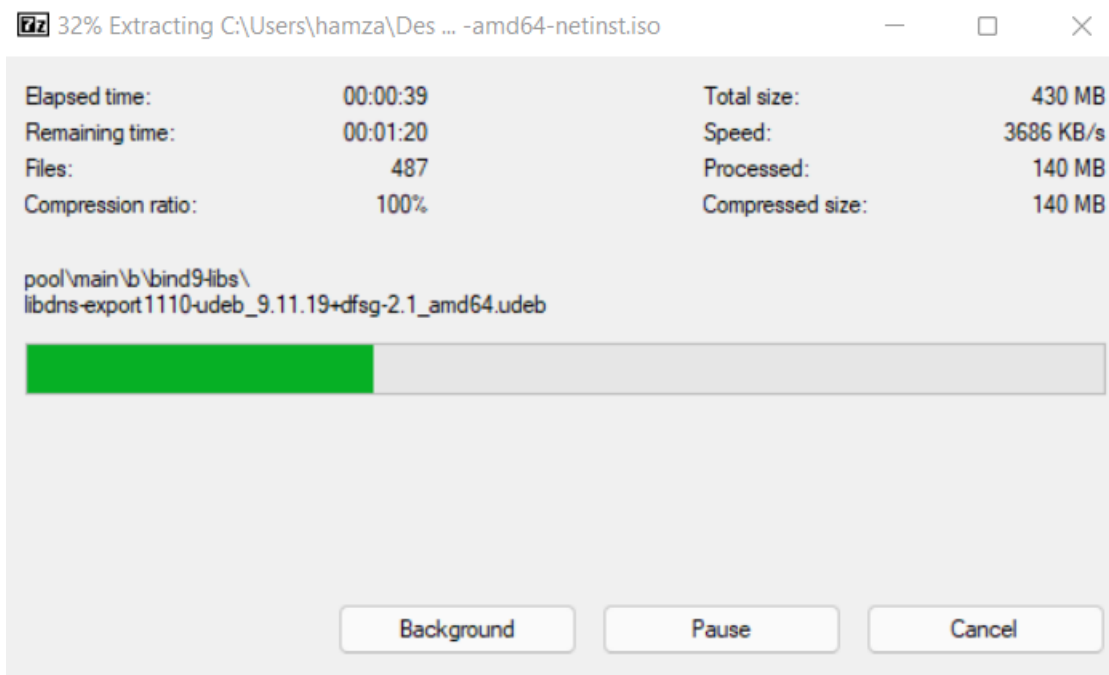

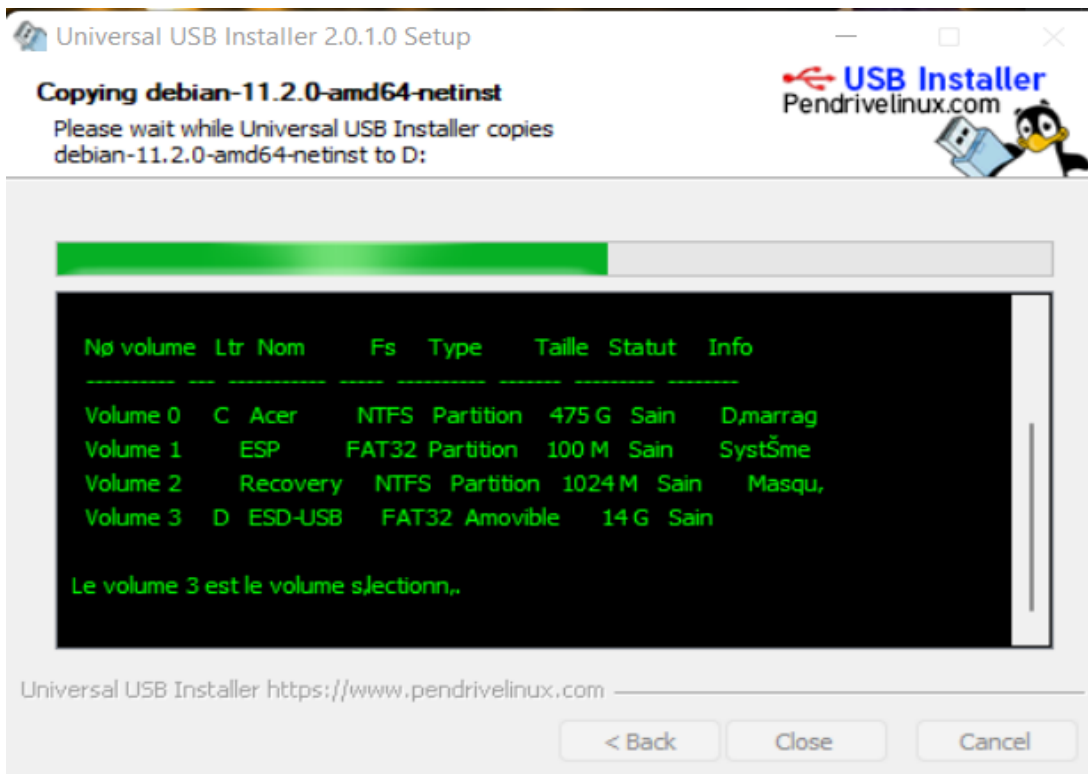

Debian.iso

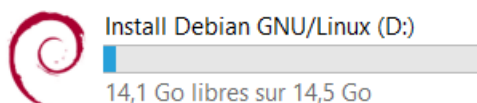

5- Press OK and finish the Setup, then Next, then Next

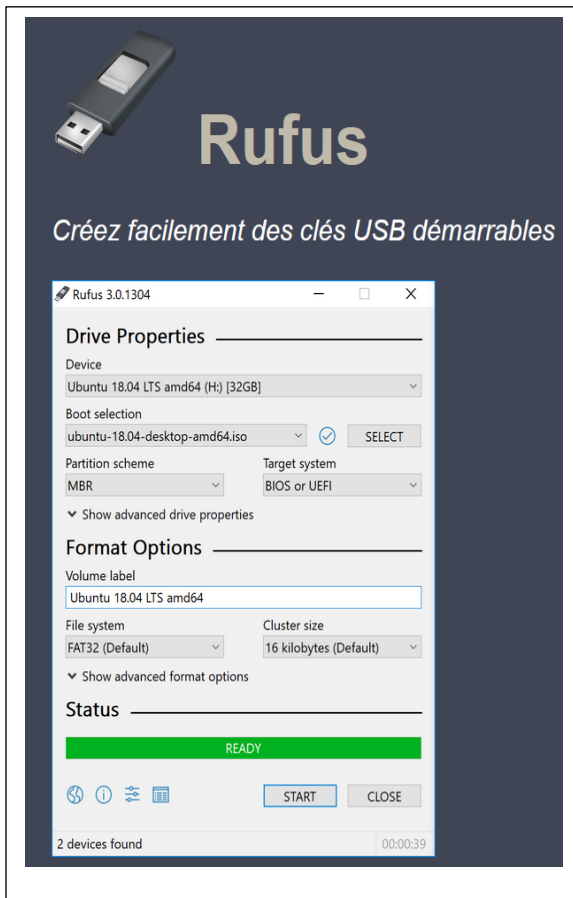

Proof that it is done:

Bootable USB Creator

- Need a device Windows or Linux of any distribution
- The related .iso
- The targeted device
- The format (fat32 or NTFS)
